

COMBINED CONSUMERS SUD

The Combined Consumers Special Utility District has been notified by the Texas Commission on Environmental Quality (TCEQ) that our drinking water now meets the standards for haloacetic acids (HAA5). The maximum contaminant level (MCL) for haloacetic acids (HAA5) is 0.060 milligrams per liter (mg/L). Compliance with this level is based on a running annual average (RAA) of quarterly sample results. Our most recent running annual average (RAA) was 0.052 mg/L. If you have any questions concerning this notice, you may contact Heath McGee, General Manager or Charles Ball, Chief Plant Operator at (903) 356-3321.
